

Delete Track Button

Request/Response Lifecycle

1. **Request** - link pressed on page
2. **Router** - find matching controller object
3. **Controller** - method invoked to handle request
4. **Model** - model queried/updated by controller
5. **View** - data sent from controller to view to construct response
6. **Response** - complete page rendered into browser

```

id of playlist

id of track

Track	Artist	Duration	
track 1	ME	12	
track 2	ME	32	

Delete Track Method

Get ID of Playlist

Get ID of Track

Delete Track from Playlist

Refresh the Current Page

```
export const playlistController = {  
  ...  
  async deleteTrack(request, response) {  
    const playlistId = request.params.playlistid;  
    const trackId = request.params.trackid;  
    console.log(`Deleting Track ${trackId} from Playlist ${playlistId}`);  
    await trackStore.deleteTrack(request.params.trackId);  
    response.redirect("/playlist/" + playlistId);  
  },  
};
```

Redirect -> Refresh the '/playlist/:id' route

Delete Track From Store

Get the
index of the
track to
delete

```
export const trackStore = {  
  async deleteTrack(id) {  
    await db.read();  
    const index = db.data.tracks.findIndex((track) => track._id === id);  
    db.data.tracks.splice(index, 1);  
    await db.write();  
  },  
};
```

Remove the track
with this index
from the array
